### Council Update

The Fire District has been overall quiet to date.

We still experience some delays with trash pick, considering the weather, labor issues and new drivers it is expected.

The pond & Breach-Way are being monitored, the storms have warranted it to be cleared frequently this winter.

The Community Center has undergone quite a few upgrades. Office has undergone a total cleanup & remodel. New window cut into door, floor, paint, cabinets, countertop, filing system implemented, closets organized, to mention a few. Both rest rooms have been painted, rust cleaned up, seat changed, painted (walls & ceiling), mirrors installed.

Shed has been cleaned along with garage area and organized.

Fire alarm system tested, new batteries for emergency lights, generator serviced and wiring corrected.

New balances installed in the windows and new glass for windows with pellet holes. All this and more, within the budget

Water service was repaired, opposite side of previous repair.

District applied for a grant to put toward cleanup at playground.

Study Commission on shore access has recommend 10' above the hightide line. We will monitor where this leads.

This council is in the process of writing a scope of work and developing a list of the tasks in order of importance and cost conscience.
